PROFESSIONAL SUMMARY

Senior Front-End Developer with 5+ years building high-performance web applications in React, Next.js, and TypeScript. Recently took an enterprise mapping platform from client-less to market-ready as the primary front-end developer, cutting a core dashboard's load time from over a minute to under 10 seconds. Equally comfortable in modern component architecture and legacy JavaScript/jQuery codebases; writes clean, maintainable code and mentor's junior developers.

SKILLS

Core	React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit
UI & Styling	Material UI, Ant Design, Atomic Design
Data Viz	D3.js, Leaflet.js, Recharts, Chart.js
Performance	Web Workers, code splitting, lazy loading, Core Web Vitals
Legacy	jQuery, vanilla JavaScript, Bootstrap

EXPERIENCE

Senior Front-End Developer · Sehr Infotech · Remote	Jun 2024 - Present
- Sole front-end developer taking an existing but client-less product to market-ready rebuilding a slow, dated interface into a fast, usable platform that went on to win and retain multiple enterprise clients. - Cut a territory-mapping dashboard's load time from over a minute to under 10 seconds offloading Leaflet's tile/marker pipeline to Web Workers, trimming API payloads, and tracing a throughput issue to HTTP/1.1 head-of-line blocking. - Restructured monolithic data fetching into per-section endpoints with debounced, lazy-loaded infinite scroll, sustaining sub-10s loads as account volume scaled all in a legacy jQuery/Bootstrap codebase.	
Mid-Senior Front-End Developer · Alagzoo Softwares · Remote	May 2023 – Jun 2024
- Led a team of 4 on Digital RX, migrating a multi-client React app to Next.js (7 months) to deliver server-side rendering and the SEO gains clients were asking for. - Led front-end on Uplift Array (with one junior), building real time student counsellor features end to end WebRTC chat/video, secure cookie-based auth, OTP and password flows, scheduling, and notifications. - Partnered directly with clients, backend developers, and designers to define and scope features translating requirements into responsive, mobile-first interfaces and shaping API contracts to fit real UI needs.	
Front-End Developer · Alagzoo Softwares · Remote	Jun 2021 – Mar 2023
- Grew past junior scope owning UI scaling and feature delivery solo on Glassboard Assure, a deal-creation and fundraising platform, using atomic design. - Delivered solo dashboard projects under tight deadlines, working directly with backend developers and designers to shape API contracts and Figma handoffs.	

FEATURED PROJECTS

LeadVector AI - LLM-Powered Lead Management SaaS · *Next.js · React · TypeScript*

- Sole front-end developer across two surfaces a Next.js marketing site [leadvector.ai](#) and a React production app [app.leadvector.ai](#) owning the entire UI end to end.
- Built the interface for an LLM driven workflow surfacing AI sourced leads and AI generated lead scores as clear, scannable dashboards for non-technical business users.
- Integrated Membrane to pull client's existing companies, deals, and contacts into the platform extending LLM scoring to their own CRM data and streamlining onboarding.

ICDT Trade Dashboard (+ Indonesia Digital Economy white-label) · *React · Recharts · react-simple-maps · Context i18n*

- Built, solo and in 2 weeks, an 8-section infographic dashboard (cosmetics, pharma, food, and more) for OIC member countries, turning client Excel data into interactive maps and charts. Still in production use.
- Architected it for reuse the same platform was later re-skinned and redeployed as the Indonesia Digital Economy Dashboard (34 provinces), a government-facing decision tool.
- Delivered multilingual support via Context API with a client-driven static-text pipeline, and a fully responsive UI.

EDUCATION

B.Tech — Computer Science & Engineering - CGPA: 8.45
