ABDUL MANAN MALIK

Senior Front-End Developer

malikmanan97@gmail.com • +91 9596460305 • Delhi, India (Remote) • Portfolio • LinkedIn

PROFESSIONAL SUMMARY

Senior Front-End Developer with 5+ years of experience building high-performance React and Next.js applications for enterprise, government, and AI-driven SaaS products. Skilled in TypeScript, Next.js SSR, data visualization (D3.js, Leaflet.js, Recharts), and performance engineering with Web Workers and Core Web Vitals. Track record of owning products end to end as sole front-end engineer in fast-paced remote Agile teams.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3
Frontend: React, Next.js (SSR), Redux Toolkit, RTK Query, Context API
UI & Design Systems: Material UI, Ant Design, Atomic Design, Responsive Design
Data Visualization: D3.js, Leaflet.js, Recharts, Chart.js, react-simple-maps
Performance: Web Workers, Code Splitting, Lazy Loading, Core Web Vitals
Real-time & Integrations: WebRTC, REST APIs, Membrane
Testing & Accessibility: Jest, React Testing Library, Playwright, axe-core, WCAG
Tools: Git, GitHub, Jira, Agile/Scrum

WORK EXPERIENCE

Senior Front-End Developer · Sehr Infotech, Remote *Jun 2024 – Jun 2026*

- Led the redesign of a legacy territory-intelligence platform into a fast, market-ready product, driving nearly 100 prospect signups.
- Cut the territory-mapping dashboard's load time from 60+ seconds to under 10 seconds by moving heavy computation to Web Workers, trimming API payloads, and resolving an HTTP/1.1 connection bottleneck.
- Re-architected data fetching into per-section endpoints with lazy-loaded infinite scroll, keeping load times stable as data volume grew.
- Sole front-end developer on LeadVector AI, an LLM-powered lead management SaaS, owning both the Next.js marketing site and the React production app end to end.
- Built dashboards that surface AI-sourced leads and AI-generated lead scores for non-technical business users; integrated Membrane to import clients' existing CRM companies, deals, and contacts into LLM scoring.
- Onboarded 2 developers onto the legacy codebase through KT sessions and code reviews.

Mid-Senior Front-End Developer · Alagzoo Softwares, Remote *Apr 2023 – May 2024*

- Led a 7-month migration of Digital RX from React to Next.js with a 4-member team, delivering an SSR architecture that improved organic traffic by 35%.
- Directed front-end development for Uplift Array, building WebRTC chat/video and scheduling features that increased platform adoption by 30%.
- Worked directly with clients and cross-functional teams to deliver mobile-first interfaces, reducing feature turnaround time by 20%.

Junior Front-End Developer · Alagzoo Softwares, Remote *Jun 2021 – Mar 2023*

- Built the ICDT Trade Dashboard solo in 2 weeks: an 8-section interactive maps-and-charts dashboard for OIC member countries, still in production.
- Architected the dashboard for reuse; it was later re-skinned and redeployed as the Indonesia Digital Economy Dashboard (34 provinces), a government decision tool.
- Delivered multilingual support via Context API and a fully responsive UI.
- Owned UI scaling and feature delivery solo on Glassboard Assure, a deal-creation and fundraising platform, using atomic design.
- Implemented WCAG accessibility fixes, validated with axe-core before each release.

EDUCATION

B.Tech, Computer Science and Engineering
Islamic University of Science and Technology • 2016 – 2020 • CGPA: 8.4/10
